DR

Dear Ms. Boyce,

I repeat my request for information about my daughters. Following your client's instructions, as per below, I kindly request information about my daughters health and well being on an on-going basis, as opposed to asking questions solely based on reaction.

This request is made in addition to my outstanding requests.

Best,

Darryl

Hi Cynthia,

I again thank-you for your prompt response. It is very much appreciated.

I am in communication with Ms. Boyce and appreciate that you have addressed the issue of communication that I raised.

I will follow your requests to not communicate with you about any issues regarding our daughters and will no longer expect any such communication from you about such matters.

I look forward to receiving the information I required with confirmation from Ms. Boyce.

Thank-you,

Darryl

Hi Darryl.

Just like Charlotte's therapist you are welcome to contact Michelle yourself for those details. I attached her info and will give her a heads up.

As for myself I was tested before, during and after my trip for Covid and all came back negative. I did not see the girls until I got the final result from Saturday's test. I followed all regulations of course.

Charlotte received a strep throat test, the doctor was not concerned about testing for Covid at that time.

To be honest Darryl, I am not really on trial here, the girls are well cared for and supported as the primary caregiver. Ironically, We await to hear from you about your treatment program.

Going forward Darryl, If you have any further questions, please go directly through Alison and do not include myself in the email. I will always do my best to get you the information you request under Alison's guidance on what is appropriate for you to know. I know you care about the well-being of the girls, and we really care about yours as well.

Have a safe weekend.

Cynthia

Hi Cynthia,

I appreciate the timely response to my questions about our daughters. I would only ask for clarification. In relation to whom was the hockey team member that you refer to? Please confirm that you were in contact with Michelle while away on vacation. Was COVID a concern before or after she was brought to the doctor Monday night for concern for strep throat? What precautions did you take with respect to Government regulations about travel to Cuba during the period in question? Were you in regular contact with all care givers during the time?

Most importantly will you communicate important information in a timely manner moving forward?

I have communicated a number of concerns to Ms. Boyce without conformation of acknowledgement, or response. I kindly ask that you allow her to respond.

Thank-you,

Darryl

Hi Darryl.

Charlotte had a cold and was brought to our family doctor Monday night to test for strep throat. The rapid test was negative. You can verify with Arbour Family médecine as you have access.

As for their absent while I was away, the two girls they were staying with had a hockey team member test positive for Covid so their mom, Michelle asked me if that my girls should also stay home. I agreed. The family was tested negative this past weekend and their girls have returned to school.

As for treating their separation anxiety caused by last summer's incident when you collapsed while they were in your care, on top of Charlotte seeing a therapist which I told you about, Maureen Doyle, my mother, my sister Kelly and Michelle Marquis supported the girls with their feelings while I was away.

We really do hope you will start feeling better soon and get some much needed treatment. Your health plays a very important role in the lives of the girls. I really hope you can get the help you need Darryl as the girls would benefit from a healthy dad.

Alison and I look forward to seeing you December 20th.

All the best

Cynthia

Hi Cynthia,

Kindly let me know the nature of Charlotte's 3-day absence from school, the doctor she was brought to, how she was cared for, and who you chose to do so.

I also await the information previously requested. I would greatly appreciate a timely answer to assuage my ongoing and repeatedly communicated concerns.

Thank-you,

Darryl
